

# Medicare Fraud Prevention Week's Successes Reflected in Report

*Senior Medicare Patrol  
National Resource Center*

The inaugural Medicare Fraud Prevention Week began the week of June 5, 2022. The week focused on actions everyone can take to prevent Medicare fraud, errors, and abuse, which cost an estimated \$60 billion annually. The week was created to raise awareness of the SMP program and to amplify SMP prevention efforts across the nation. Preventing fraud can protect the integrity of the Medicare program for everyone for years to come.

The Senior Medicare Patrol National Resource Center created an impact report, which includes analytics from the SMP Center's outreach efforts from social media, a Hulu campaign, and partner efforts.

To view the Medicare Fraud Prevention Week Impact Report, [click here](#). You can also find the report in the [Medicare Fraud Prevention Week](#) entry in the SMP Resource Library.

The Administration for Community Living (ACL) and the SMP Resource Center are grateful for all who participated in the successful event and can't wait to do it again next year!
